

**MERLO**  
RENTAL

*Extend your advantage with Merlo's new rental fleet.*

*Take advantage of Merlo's factory direct rental.*

Merlo rental offers our complete range - direct to you Telescopic handlers, self loading mixers and tracked transporters. Backed by our national dealer network, Merlo can provide the best equipment with peace of mind of knowing that wherever you need to work - Merlo is there with you.

- "Factory direct" machinery
- Very competitive rates
- 24 hour service and support

*Get more business versatility from the world's most versatile telehandler.*

In today's business environment, the need for cost effective problem solving is critical. Designed with multi-functional access and materials handling capabilities, the telehandler is a "ready made" solution. Merlo is a world leader in the design and manufacture of telescopic handlers and related material handling equipment. The company has forged it's reputation on its innovative approach and advanced technology, receiving recognition world-wide through numerous industry awards.

*Unparalleled Safety*

At Merlo, we recognise the importance on safety. That's why we have introduced the "Merlo Load Management System" (LMS), a load limiting system that includes a fully automatic tool recognition display module for enhanced performance and peace of mind.

The Merlo Load Management System (LMS)

The system's display module is a state-of-the-art full colour, high resolution LCD screen which operates in real time. Audible alarms from the inbuilt speakers are also included. The Merlo (LMS) is one of only a few safety systems that exceed the requirements of AS1418-19 and is equipped with numerous features including;

- Lifting Load, percentage of Rated Capacity and warning symbols
- The current attachment as well as the attachment name, load centre and any additional configuration information
- Stabiliser position if fitted, as well as forward and reverse indications
- Boom angle, height, radius values as well as boom length indication using the standard "ABCD" markings.
- Load totalisation features are available as an option.

*Choose from Merlo's wide range of access and materials handling equipment.*

*The Range*

**Panoramic** - Telescopic handlers that are specifically designed for the ultimate lifting performance. Unrivalled in their class, they are also easy to operate and are highly adaptable for any type of business. Models available: 24. Lift capacities: 3,400 kg to 10,000 kg. Lift heights: Up to 18 metres.

**Compacts** - Telehandlers that are designed for confined areas. Easy to operate with a powerful engine that allows even the hardest of tasks to be carried out efficiently. Models available: 8. Lift capacities: 2800 kg to 3200 kg. Lift heights: Over 8 metres.

**Turbofarmer** - High specification, power up to 140HP and compact dimensions allowing operation in confined spaces, coupled with excellent towing capability makes the Turbofarmer the most efficient machine for all agricultural applications. Models available: 16. Lift capacities: 3,400 kg to 4,100 kg. Lift heights: Up to 9 metres.

**Multifarmer** - The idea that revolutionised agricultural material handling. The telescopic handler with rear mounted three point linkage, full power mechanical PTO, available with homologation as an agricultural tractor for towing on the road. Models available: 6. Lift capacity: 3,800 kg. Lift heights: Up to 9 metres.

**Roto** - The telescopic handlers specifically designed to operate at great lift heights with maximum safety and efficiency, with the added advantage of slewing capability. Models available: 10. Lift capacities: 3000 kg to 5000 kg. Lift heights: Over 25 metres.

**Cingo** - The hydrostatic tracked tool carriers with the ability to work where traditional machinery cannot reach. The number of different interchangeable tools and attachments make this machine virtually irreplaceable. Models available: 6. Lift capacities: 600 kg to 1000 kg. Over 80 different combinations.

**DBM** - The self loading concrete mixer for those who need the maximum operating flexibility in the production and placement of concrete. Models available: 3. Load capacities: 2000 lt to 3500 lt.

*Interchangeable Attachment Range*

The vast range of unique Merlo attachments gives rise to a new meaning of versatility for telescopic handlers. There are countless innovative working tools which maximise the potential, enhance versatility and optimise the use in any application sector. All attachments are designed and manufactured by Merlo in full compliance with the national safety standards.
